Research Interest

Machine Learning, Deep Learning, Computer Vision, Medical Imaging, Generative Models, Learning Theory, Robustness, Interpretability, Statistical Inference, Probabilistic Methods, Computational Physiology

Education

PhD in Computing and Information Sciences — Aug 2015 - Aug 2020
Rochester Institute of Technology, NY — *GPA: 3.9/4*
Advisor: Prof. Linwei Wang, Lab: Computational Biomedicine Lab

B.E. in Electronics and Communication Engineering — Nov 2008 - Oct 2012
Institute of Engineering, Tribhuvan University, Kathmandu, Nepal. — *Grade: 85.1%*
Specialization: Image Processing and Pattern Recognition — ***Ranked 1/346 in IOE***

Work Experience

Senior Engineer/Researcher — Feb 2023 - Present
Camera Algorithms, Qualcomm Inc.
Supervisor: Hau Hwang
- Developing light and efficient computer vision algorithms for small device cameras.

Postdoctoral Research Associate — Sept 2020 - Feb 2023
Department of Electrical and Computer Engineering, Northeastern University
Supervisor: Profs. Octavia Camps, Jennifer Dy, Dana H. Brooks
- Working at the intersection of machine learning, computer vision and medical imaging

Graduate Research Assistant — Aug 2015 - Aug 2020
Computational Biomedicine Lab, Rochester Institute of Technology
Supervisor: Prof. Linwei Wang
- Worked on machine learning and statistical inference with applications to medical imaging

Research Intern — Jul 2019 - Sept 2019
Medical Sieve Radiology Group, IBM Research, San Jose
Supervisor: Dr. Mehdi Moradi
- On improving generalization of convolutional neural networks while classifying medical images

Electronics/Electrical Engineer — Mar 2014 - June 2015
Nepal Electricity Authority, Central Office, Kathmandu

Research Themes

Computer Vision, Video Analysis and Dynamical System
Northeastern U, Qualcomm
- Worked on image and video understanding from dynamical system perspective, image processing, denoising, tracking, detection problems.

Theoretical Machine Learning
RIT, Northeastern U
- Worked on theoretical machine learning projects like learning theory, generalization bounds, kernel methods, RKHS, measure theoretic approaches, sampling complexity and statistical estimation.

Medical Imaging and Biomedical Signal Processing
IBM, Northeastern U, RIT, MSKCC

- Worked on different image analysis and biomedical problems using deep learning/ machine learning on cardiac signals, skin datasets, X-ray images.

Generative Models
RIT, Northeastern U

- Worked on generative models like VAE, GANs, Diffusion models and applied on standard datasets as well as non-standard data like spatio-temporal cardiac signals and skin images.

Probabilistic Graphical Models and Inference
RIT

- Integrated multiple sources of knowledge and data using PGM framework and proposed several inference strategies to solve the inverse problem of electrophysiological imaging.

Miscellaneous
RIT, Northeastern U

- Worked on semi supervised learning, geometric deep learning, uncertainty estimation, and interpretability of deep learning models.

Mentoring Experience

Armand Comas — With Octavia's supervision, I worked closely with Armand on sproject related to disentanglement and interpretability of video, especially introducing Koopman perspectives to interpret and manipulate dynamic components of a video. See this paper.

Max Torop — With Jennifer's supervision, I mentored and worked closely with Max on self supervised learning and out-of-distribution detection topics with the application to medical image analysis. See this paper.

Aria Masoomi — I worked closely working with Aria on generalization, kernel methods and interpretable methods under the supervision of Jennifer.

Davin Hill — I have been mentoring and closely working with Davin on uncertainty and interpretability of deep learning models with the supervision of Jennifer.

Morgan Kohler — With Octavia's supervision, I worked closely with Morgan mentoring him on the project related to disentanglement and interpretability of video.

Xiajun Jiang — With Linwei's supervision, I mentored and worked with Xiajun on applying graph neural networks to solve inverse problems and electrophysiological imaging. See this paper

Pradeep Bajracharya — With Linwei's supervision, I mentored and worked with Pradeep on Bayesian neural networks and uncertainty quantification.

Nilesh Kumar — With Linwei's supervision, I mentored and worked with Nilesh on learning transformations from data and applying them for data augmentation.

Awards and Achievements

IPMI Scholarship for junior scientists - awarded to 10 authors at IPMI 2019 conference.

GCCIS Travel Grant by Golisano College of Computing and Information Sciences to present research work at MICCAI 2017

RIT PhD Scholarship/Assistantship 2015-2020. Financial Support for PhD study at RIT.

Prof. F.N. Trofimenkoff Academic Achievement Award for graduating at the top of class (1/346) in B.E. Electronics and Communication, Institute of Engineering.

The College Fellowship (2008-2012) by Institute of Engineering, Central Campus, Pulchowk based on

academic merit and performance.

Undergraduate Scholarship (2008-2012) by Institute of Engineering to support tuition during the undergraduate studies at Central Campus, Pulchowk. Rank: 10/12000 in the entrance exam.

Golden Jubilee Scholarship Award 2008 by Government of India based on academic excellence

Mahatma Gandhi Scholarship Award 2006 by Government of India based on academic excellence
